Kananaskis Road Opens For The Season

Travel on the Kananaskis road was resumed at 8 a.m. Sunday following damage to the road by spring runoff. The road had previously been open for 35 miles then closed again when the road block was ignored by motorists.

Fishermen and campers invaded the area soon after the opening, including a party from Idaho. The fame of the area is growing fast in the States and adds to the need for Coleman to take advantage of this potential rich tourist trade.

Fishing in the rivers in the Coleman area is reported to be good and Coleman merchants are providing anglers with their every need. Rivers open this year include the Livingstone, Oldman, Crownest, Castle, Pincher Creek and Mill Creek.

Closed this year are; the Carbondale and tributaries. All tributaries to the downstream right bank of Crownest and tributaries to the Crownest Lake; Racehorse Dutch Creek and Drywood river and their tributaries.

FIRE IN EAST COLEMAN

Coleman Volunteer Fire Brigade answered a call to East Coleman again Saturday morning and although they were unable to save the building involved, prevented the fire from spreading.

Flames consumed the summer kitchen at the residence of A. Beigun, the fire having a good start before the Coleman crew arrived at the scene. Once again the lack of water prevented the firemen from saving the building and their efforts were directed at removing fences that could lead fire to other buildings and the spraying of water on adjoining homes.

Music Exam Results

The following pupils of Alice Buckna were successful in the recent Western Board of Music practical and Theoretical examinations held in Blairmore recently.

THEORY Grade I. First class honors, Nick Misura.

Grade II, First class honors, Darryl Ruymakers, Frances Amato, Beverly Bond, Josette Malanchuk, Heather Fleming, Dennis Seaman, Doreen MacQuarrie, Honors, Dolores Somshor.

Grade IV First Class Honors, Dolina Celli Mary Wilson, Helen Morris, Joanne Montebelli. Piano, Grade II Honors, Myrna Costanzo, Elsie Mizera, Pass, Bernice Fontana.

Grade III Honors, Doreen Eddy, Karen Malanchuk, Reynold Bartelotti, Edna Yagos, Lorraine Diezic, Marjorie McCrear, Pass, Donnie DeCocco, Connie Hayson, Marilyn D'Appolonia.

Grade V Honors, Beverly Bond, Dolores Somshor, Heather Fleming, Pass, Shirley Liebergal.

Grade VI Honors, Margaret McDonald, Sheila Penny.

Grade VII First Class Honors, Gloria Smalofita, Joanne Montebelli, Honors, Mary Wilson, Pass, Delina Celli.

Grade IX Honors, Jenice Comin.

The highest marks in theory were obtained by Darryl Ruymakers of Bellevue and in the practical examinations by Joanne Montebelli of Coleman and Gloria Smalofita of Blairmore. The Bulletin Board prizes were taken by Sandra Holyk and Georgina Misura of Coleman.

The following is the result obtained by pupils of Mrs. Arline Hill L.R.S.M. in piano examinations of the Royal Conservatory of Music of Toronto.

Grade I Distinction—John Cousins.

Grade VII, Honors—Dianne Dickson.

Grade II 1st Class Honors—Caron Johnson, Beverly Kemp (Blairmore).

Grade I, 1st Class Honors—Margaret Hereford, Elaine Hereford, Honors John Cousins.

coal entering Canada from the States. If the Americans can put an embargo against Canadian agricultural produce, we can do it for coal. When 11 million dollars can be given to the gold mining industry, which is good only for plugging teeth or the making of watch chains and wedding rings, then something can be done for the coal industry. I would like to know who controls the government. If they take the bulls by the horns and impose an embargo industry will use our Canadian coal.

In closing the speaker emphasized the growing strength of social credit and spoke of his Liberal and Conservative opponents as the gentlemen. He has served his constituents faithfully and diligently and solicited their support in the election.

R. Woods served as chairman for the meeting and introduced the speaker and W. Kovach, M. L.A., who spoke briefly on the last session of the provincial legislature and the progress that the province has made under Social Credit.

Car Plunges Into Lake Driver Escapes Uninjured

Crownest lake claimed one car and nearly one life late Monday night when the 1947 Cadillac driven by Mike Aldoff plunged over the side while proceeding east from Michel to Coleman.

Mike reports that he was driving along the low part after passing Glacier Cabins when the car started pulling towards the lake. Mike was unable to control the car and it plunged into the lake. Windows were open on both sides and Mike was able to escape. Swimming back to the edge of the lake Mike was picked up by a passing lumber truck.

The car was not visible and it is not expected that it can be raised. Estimated depth at the spot is 80 feet.

School Debentures Sold To J. Richardson and Sons

Coleman School Board met in regular meeting Monday July 13 and heard a request from E. G. Montalbetti, tenant in the school residence, that the board look into furnace, wiring and the matter of a fence for the school residence. Works and Property were instructed to look into the matter.

Following the adoption of the financial statement and the budget, the trustees considered the advisability of a joint insurance for the two room addition with the contractor, the board carrying the insurance after the building is complete.

All debentures were reported sold to James Richardson and Son in association with Nesbitt Thompson and Co. of Toronto. Debentures sold for 99 on the 100 and represents a net yield of 487.20 year debentures at 4 1/2%.

A letter of thanks was received from Barbara Kwansie on behalf of grade 2 in appreciation of the gift of coronation cups and saucers.

Applications were received from Mrs. Rose Watson and Mrs. Alma Roughton for substitute teaching.

Further correspondence dealt with quotations on new furniture from Moyer School supplies.

A letter of thanks from Geo. Kolibus thanking the board for sponsoring him in the Recreation leadership course, and the report of the Building Inspector.

Architects Meech and Meech requested that an engineer be in attendance when concrete was being poured for the school addition. The board favored this request and notified the firm that pouring was to start last week.

The inspectors report on the school completed a good year for the Coleman staff with all teachers having received excellent reports.

A letter of thanks was received from Capt. Carey of the Salvation Army for the use of the auditorium.

The tender of O. Celli for the water tank was accepted.

Mr. Allen reported on the teacher situation and the steps that have been taken. It was reported that Mrs. Elizabeth E. Shevels, Bellevue, has been secured to teach grade 3 and Mrs. Grace France, Coleman will teach grade 2. A teacher is needed to teach English and community economics in grades 7, 8 and 9.

Mr. Easton had resided in Coleman for the past 49 years, coming here on Oct. 8, 1904. During these years he has operated a dry goods store, a bakery, and a decorating business. Interested in community affairs, he has served on the council and the volunteer fire brigade, as well as helping to organize and serving with the local band for 25 years.

A sports enthusiast, he was active in local hockey, baseball and curling. During the first Great War he enlisted from Coleman and served overseas. He is a member of the Canadian Legion and the United Church and its organizations.

The Eastons have three children, a son Chellis at Seattle, and two daughters, Mrs. E. S. Tomlin, British River, B.C., and Mrs. James Adams, Calgary.

Mr. and Mrs. A. Easton To Reside At Coast

Mr. and Mrs. Alex Easton left Thursday to reside in Vancouver after many years as active and respected citizens of Coleman. Their departure from the community has been felt by their many friends.

Mr. Easton had resided in Coleman for the past 49 years, coming here on Oct. 8, 1904. During these years he has operated a dry goods store, a bakery, and a decorating business. Financial System That Won't Work Is Tragic Hansell States In Opening Speech of Election

"No system is more funny or more tragic than one that won't work" were the words that stuck with the small assembly that gathered in the Italian hall in Friday night when Rev. E. G. Hansell, M.P., fired the opening shot in the federal election campaign. This pointed statement climaxed a two-hour address by the member when he emphasized the financial policies of the present system in contrast to that system that would be adopted by the Social Credit.

In opening his remarks the speaker commented on the 18 years that he has served the voters of Coleman and emphasized that Social Credit was something that although it may not take hold fast went like wildfire when it does take hold and sticks.

Compares War Production and Peace

Getting into the financial problems and their solution early in his talk, the speaker showed how in wartime production was at a high level as was the national income. During peace however production plies goods up higher than the people have the money to buy. There is never enough money out of production to buy back the materials we produce, therefore during the depression years we saw the cutting back of production and the destruction of surpluses. The Social Credit proposal was to make up the money through the consumer end rather than at the production end, or equate production with consumption.

During the war we produced at full speed even though thousands of our men were out of production and in the services. At this time the national income was also up. However a great portion of the production was converted or aircraft. No one bought a corvette or a plane, thus the purchasing power was higher than the production for civilian use. To control the rise of prices when more money was available than merchandise the Liberal government instituted price control, floated victory loans and war savings certificates and imposed increased income tax and rationing all in an effort to take surplus spending power out of circulation. The speaker paid tribute to the job done at this time, but emphasized that if in wartime they have the sense to take money

out of circulation, yet in peace time when production of consumer goods was high and money short they do not have sense enough to put money into circulation. This is the action that Social Credit would take. The Social Credit financial system is not complicated . . . the present system is.

One often hears the question "Where will the money come from?" Half the people you meet don't know where the present money originates. Money today is produced by the Chartered banks everytime they issue a loan. Our belief is that full production belongs to the people and should be distributed to them. Enough money should be available to permit them to buy their needs.

Although there is not too much life in this election, the Social Credit movement is bothering the big shots. We are making progress the speaker stated and I believe that the old parties have written the west off. Mr. Drew has proposed a reduction of taxes. Mr. St. Laurent has asked what expenditures he will cut to make this saving, and Mr. Coldwell has come out and stated that Drew has promised the impossible. Mr. Low however has stated that it is not impossible, but that Mr. Drew cannot do it because he is operating on the same financial policy as the Liberals. This reduction could be made under the Social Credit policy.

To answer Mr. Low the Prime Minister said that Social Credit was a funny money scheme, but he didn't say what was wrong with it. "I believe," the speaker stated, "that it is Mr. Abbott's dollars and present money system is the funny money."

When Mr. Abbott's estimates came up in the House Mr. Hansell asked that how was it that a few years ago a dollar was worth a dollar while today it was half this amount? Workers of a few years ago saved money or instituted pension plans preparing for their future. These savings are of only half value today. I want to know and the country should be told, the Social Credit or said, what policy are you going to pursue to restore the dollar to the value of a few years ago.

Surely the buying power of the dollar is of national importance, but Mr. Abbott did not answer

the question, he can't . . . he hasn't a financial policy to solve it. They are the funny money men.

Mr. Martin is happy with his social services and the millions that he is spending on it. He can do it because this is a time of comparative high national income. Suppose that another depression and a low income how can he continue when he can't get the millions. Mr. Abbott's answer was that Canada has faced critical times in the past and came through and that he is sure that she can do it again. They cannot answer these questions . . . theirs is the funny money.

In peace time we have production so high that we cannot find markets while half the world is starving.

Explaining the world banking system he showed the difference in national income in various countries, showing how the devaluated British pound forces the Briton to work longer hours to earn a bushel of our wheat, whereas a Chinaman, whose average income is \$35 a year, has not enough hours in a day that he may work to buy a bushel of wheat. This is because of faulty world financial system. Mr. Drew asserts that we must regain our markets, yet the Liberals would if they could. Anyone can say this but when you ask them how—that is a different matter. We have a policy, Mr. Hansell asserted, a policy of goods for goods. We would set up import and exports boards. When the goods came in we would set the prices.

Our economy would collapse tomorrow if it was not for the defence production of today. We are more afraid of peace than we are of war. It is more than a funny money system, it is tragic. One reason that the election has been called for early in August is that when the new crop is in the farmer may find that their quota might be only 2 or 3 bushels per acre. This is at a time of over production and cut back of production when half the world is starving.

Localizing this talk, the speaker emphasized his action in regards to coal, and read the speech that he gave in the House. In order to keep the coal industry solvent he felt that it is necessary to put an embargo against

THESE HOMES ARE FOR THE BIRDS—Most birds nest in ordinary places. At least they are ordinary for birds. But in every group we are able to find a few individualists with the urge to try something different. However, when seen from a bird's-eye view, perhaps these peculiar nesting places are not so different after all.

These Chicago, Ill., rubble nest in secure safety as long as no one kicks the bucket.

A St. Louis, Mo., blue jay proudly displays a union label. Poppa is a working man.

This lady robin picked a coil of wire at the Schenectady, N.Y., Army Post.

GIANT U.S. SUPERFORTRESS—Development of the aircraft engine has been an endless quest for greater and greater power and to what lengths this quest has reached is shown in this photograph of a giant U.S. B-50 Superfortress kept aloft by one turbojet engine lowered experimentally through the fuselage. The little streamlined bulb contains a Pratt and Whitney Turbo-Wasp, today's most powerful turbojet engine aloft, and for this test of power, the four piston engines that normally power the big warplane were shut down and the propellers feathered.

PARTED WITH PETS—When she left her home in Renaix, Belgium, to join her brother in Windsor, Ont., Adelaide Lorfie evidently didn't know about Canadian quarantine regulations so she had to say goodbye to her pets, Douna, a St. Bernard, and Souky, a Pomeranian, before she came ashore from the Holland-American liner Ryndam. She will be reunited with them when quarantine regulations have been met.

SQUIRREL FRIEND—Douglas Holmes, of Grand Rapids, Mich., shows off his pet squirrel 'Skip' to his seventh grade classmates at Union High School. The boy found 'Skip' several weeks ago and the two have become inseparable friends.

CHIEF PILOTS, BUSH PILOTS, MAINTENANCE CREWS and the men that feed them line up at Niclau, the largest of six air strips cut out of the New Brunswick spruce forest. The men are all part of "operation budworm" a forest spraying project of New Brunswick's forests in an effort to curb the destructive insects. Two governments and several pulp and paper companies have joined forces to eliminate the budworm, usually a harmless bug, who in recent years has appeared in epidemic numbers and threatens to turn the valuable forest into a useless wasteland. Every day, weather permitting, 70 planes employed in the project take to the air and cover the vast area, just skimming the tree tops, and spray the forest with an insecticide. The operation is believed to be one of the largest spraying operations in the world.

United States issued this 5-cent stamp this month to mark 100 years since Japan was opened to western commerce.

BY DERRICK TO THE SEA—This West Coast combination-type fishing vessel, the "North Star", built in Vancouver and bought by Canada under provisions of the Colombo Plan, is lowered into the water at Ceylon from the deck of a freighter. The versatile little ship, with a sister ship christened the "Canadian", made the long voyage as deck cargo under the supervision of British Columbia fishermen who will assist the Ceylonese in surveying the fish potential of the continental shelf surrounding Ceylon.

CRACKERS AND CHEESE—It is a good old American custom to celebrate the Fourth of July with a picnic. And, what better refreshment for a picnic than crackers and cheese. Serving up his special brand for the day, our photographer combined (fire) crackers and cheese (cake) to produce the eye-appealing picture of Norma Randall, Hollywood actress, seen above.

LIMPING LEADER—Down but not out, Sen. Robert A. Taft (R., Ohio), is seen above on crutches as he limps about his Washington, D.C., offices. Taft has given up the active Senate Majority leadership because of a hip ailment for which he is being treated.

SECOND LARGEST LAND ANIMAL—The hippopotamus, second largest of land animals, is able to walk under the surface of a river as long as 10 minutes at a time. It has a huge lung capacity and the ability to close its nostrils so water cannot enter.

UPSIDE DOWNS DUPLICATE—Peering back at him is the distorted reflection of a Westinghouse engineer. Seen above in the Cleveland, Ohio, plant, he is checking the lamp-changing mechanism which enables the light to function at the same intensity even though one of the 3,000,000-candlepower lamps burns out.

OUR COMPLETE SHORT STORY —

The Blue Hat Mystery

Gertie Was An Old Girl Friend
Of Bob's Which Disturbed
His Wife, Doris, Greatly.

By MARY L. AKSIM

"BUT what's she like, Bob?" Doris pleaded, as he handed her the letter.

Bob shrugged. "You'll see soon enough. The letter says at three to-morrow afternoon. It must be you she's coming to see! Anyone would know I'd be at the office then."

He turned back to his breakfast as Doris followed the neat black lines of the letter impatiently. Why, or why, she agonized inwardly, did this old friend of Bob's have to choose this week of all weeks? She would have to give the house the thorough cleaning she had been postponing since the twins came down with whooping cough, and perhaps invite one or two of their friends to meet the visitor. Yes, that would be the best plan, she decided. She'd call Ellen, and perhaps Margaret. That would keep the conversation flowing until Bob could take over. She laid down the letter.

"Did you know her very well?" she asked innocently.

"Who? Oh, Gertie!" Bob answered lightly. "Pretty well. Went to school with her back home." His heartiness was almost convincing.

"And after?"

"Oh, after? There wasn't much. Just a few baseball games. Can't think why she wants to look me up."

"Mother!" That was Garry calling. Then Ted was making croaking sounds. Doris rose wearily. "Well, you might take your old friend out to dinner," she suggested good-naturedly.

Bob reflected. "That might be a good idea!" he said.

As soon as the boys were settled, Doris sat down at the telephone. Ellen and Margaret both could come, and they responded to her suggestion that they dress for the occasion.

"She's an old girl friend of Bob's," Doris told them. "And she's fresh from a dress designers' conference in New York."

She studied herself thoughtfully in the hall mirror as she went to take the vacuum cleaner from the closet. Certainly she was not at her best this morning. But she'd like to see Gertie Westaway after she'd been waiting on a pair of seven-year-olds with the whooping cough. But Bob

had certainly jumped at the chance to take Gertie to dinner! How well had they known each other? The thought kept darting at her happiness all day. She answered the twins' demands and cleaned the house and prepared dinner, but when she sat at the table with Bob her appetite had left her.

Three o'clock the next day found Doris nervous but prettily gowned in a polished living room waiting for the bell to announce her guests. The boys were united in their own room again and she had allowed them to keep the cat to amuse them. The door-bell rang and she stole a last glance in the mirror to reassure herself.

Gertie Westaway stood on the doorstep and Doris felt for a moment as if she were addressing one of the beauties in a magazine. The vision was all in a charming shade of blue from her hat, upon which a bluebird poised, to a swath of blue gauze around her throat, to a beautifully cut tailored suit. Doris threw the door wide and breathlessly introduced herself.

"Oh, yes," laughed Gertie on a high note of gaiety. "Bob always wanted to get married!"

Ellen and Margaret arrived at that moment and Doris piloted them to the guest room to remove their hats and gloves. She could read approval of Gertie in her friends' faces as the afternoon slipped by. Bob was home before Margaret and Ellen said good-bye and there was much good-natured teasing as he came into the room.

When her friends left, Doris and Bob turned to school days and friends back home. Bob's home town. Doris waited nervously for Bob to suggest taking Gertie to dinner upstairs, but he seemed to have forgotten about it. She reviewed mentally the contents of the refrigerator and was just about to mention dinner when Gertie rose to go.

They went up the stairs to the guest room, past gusts of very healthy-sounding laughter from the twins' room, and Doris explained about the whooping-cough. Gertie made the conventional sounds of sympathy and sat down at the dressing table to smooth her hair before adjusting the bluebird masterpiece.

Doris noticed it the moment Gertie turned to the mirror. The bare space on the bed where the blue hat had been! She swayed weakly as Gertie went on talking with her back to Doris. Surprisingly, she swept her hand behind the bed to see if the hat could have dropped from the spread. And then a dreadful suspicion put strength into her limbs. Those giggles from the boys' room! She was across the hall like a vengeful fury.

And there on Garry's bed was the blue hat and the bluebird was without its tail and many of its feathers! The cat! She tried to hush the twins' hysterical outbursts.

Doris went abjectly back to Gertie and tried to explain and called Bob upstairs to make some monosyllabic apologies which came perilously close to exposing his own apartment. Gertie said nothing at all. She looked at Bob as if she was seeing him for the first time.

Doris couldn't blame her for the cold way she went down the stairs and out through the hall to her car carrying her ravaged millinery tenderly. And when the door was closed she scolded Bob and the twins energetically and with telling effect.

But her heart was lighter than it had been for two days.

WILD ANIMALS SHOULD NOT BE TAMED, ADVISES GAME COMMISSIONER

REGINA.—Wild creatures, unless seriously injured, should be left alone by mankind. This was stated by Provincial Game Commissioner E. L. Paynter.

Mr. Paynter said that this not only applies to wild animals, but it also includes migratory waterfowl. Wild ducks and geese have been captured by humans and later tamed, however, this has been found an unsatisfactory practice since it results in poor conservation management.

The Game Commissioner recently received a request for a permit by a Saskatchewan resident to keep a small fawn. The party requesting the permit stated the fawn had been abandoned by its mother. The permit was granted only because once human scent was transferred to the animal through petting and handling, the mother never again will have anything to do with it.

The game branch looks upon this sort of thing with disfavor. Mr. Paynter said, because in less than one year an animal taken in its infancy by humans usually turns out to be a definite menace. He warned that anyone coming into possession of wild game must have a permit from the game branch of the Department of Natural Resources to retain the creature or creatures, and that a further permit is required for their disposition.

A New Hampshire red hen presented its owner, Erskine Rodgers of LaChute, Que., with a complete double egg—one egg inside the other. The whole egg measured 8½ inches long and 7 inches in circumference.

Waterfowl Survey Now Under Way

REGINA.—A spring and summer waterfowl survey by aircraft and ground parties, to determine population trends, is now underway in Saskatchewan. The survey will be conducted by the U.S. Fish and Wildlife Service, the Canadian Wildlife Service, Ducks Unlimited, and the Saskatchewan Department of Natural Resources.

To be carried on throughout the summer until sometime in August, the survey will have three distinct phases: breeding, hatching, and banding.

Areas of the highlands in Scotland have been turned into cattle ranges like those in the western part of the United States.

R.C.A.F. Team Have No Liking For Arctic "24-Hour Sunshine"

VANCOUVER.—A para-rescue team has come home from the northland with tales of Eskimos sweating in the Arctic "heat".

Gazing happily at murky Vancouver skies, the R.C.A.F. men cried: "Look, no sun!"

Sgt. Ldr. Dick Wynne, doctor from the Air Force's nearby Comox Base, and Cpl. Jack Strachan, medical attendant, returned recently from Coppermine, near the Arctic Circle, where they jumped by parachute to help an ill R.C.M.P. constable.

Constable Victor Cormier, formerly of Belle Isle, N.S., was taken to Edmonton on the return trip, suffering from a chest ailment.

"The operation was a success," reported Wynne. "We drained fluid off his lungs in an operation at the village and later brought him back to

Edmonton. He will recover."

The pair had little comment on the 2,000-mile trip, or the hazardous jump, but made a paradoxical complaint about weather in the northland.

"We didn't see night from the time we left until we got back to Edmonton," reported Strachan.

"Eskimos find it so hot in the proper daytime hours on the Arctic Ocean now that they use those hours for sleeping and get up in the evenings when it's cooler."

"At midnight, there'd be Eskimo youngsters playing football near where we were trying to sleep."

Three days after they arrived at Coppermine the winter's ice went out of the river there, enabling a small aircraft to pick them up to start the trip southward.

ODDITIES In The News

Eugene Duda's girl friend took the blame after his car jumped a curb and knocked down a lamp standard causing a total of \$400 damage at Windsor, Ont. "It wasn't his fault," she told police. "I kissed him." The girl's name is Betty Loveless.

A calf, born on the Glen White ranch near Amelia, Neb., has no hair except a fringe around its shoulders. During the spring, the calf had to be kept in a barn because of the cold. This also will be necessary during hot weather to keep the animal from getting sunburned.

Juan Marron of Arcadia, Calif., says he lived to be 100 because he avoided matrimony. "Marriage is for women only," he said on his birthday. "A man should have nothing to do with it."

A New Hampshire red hen presented its owner, Erskine Rodgers of LaChute, Que., with a complete double egg—one egg inside the other. The whole egg measured 8½ inches long and 7 inches in circumference.

Exhibitors' Schools At Hartney And University

Two exhibitors' schools — one at Hartney and the other at the University of Manitoba, Fort Garry — have been arranged by the Manitoba Horticultural Association.

The Hartney School, sponsored by the Hartney Horticultural Society, will be held Thursday, August 8th. The exhibitors' school in the Plant Science Division of the University will be held Tuesday, August 11th. Delegates from all horticultural societies of Greater Winnipeg are expected to attend the University event, and both schools are open to the public.

Purpose of the schools, states F. J. Weir, Provincial Horticulturist, is to give information on selection and preparation of vegetables, fruit and flowers for exhibition. Demonstrations in each of these fields will be given by competent horticulturists. Visitors will be given the opportunity of trying their hand at judging.

Additional information may be obtained from Mr. Weir, Manitoba Department of Agriculture, Legislative Building, Winnipeg.

Quick Canadian Quiz

1. Which province has the greatest area suitable for farming?

2. In the Canadian fur trade what animal provides the greatest number of pelts?

3. Canadians in what occupation pay the highest average income tax?

4. Priority Allowance payments total \$17.5 million per month when started in 1945. What is the present monthly cost?

5. Agriculture leads in the value of production in what provinces? Answers in Another Column

He Was Dead Five Hours

Underwater for 25 Minutes, Given Up by Doctor, This 10-month-old Boy Was Brought Back to Life — Frank, Alberta, Mother Tells her Son's Story.

* NOTE: This is a true story from the files of the Health League *
* of Canada. It is published here as dramatic proof that drown- *
* ing victims can be revived after five and six hours of apparent *
* death — if artificial respiration is started at once and kept *
* up until success is achieved or until rigor mortis has set in. *

"Walter Vysholli" would be a name on a tombstone in Frank Alberta, if his mother had believed a doctor 25 years ago. The doctor pronounced him dead from drowning at 10 months of age. Instead, Walter Vysholli is a fireman on the Canadian Pacific Railway, a happily married man with two fine children. And he owes his life to an Italian ice cream peddler — a man who had no medical knowledge but who was possessed of a life — sustaining faith.

Here is how 10-months-old Walter was "drowned" in the words of his mother, Mrs. J. A. Vysholli, who still lives in Frank, Alta.:

In the month of June in 1928 — it was a Saturday afternoon — I had my boys (both babies then — the older 22 months, the baby just 10 months) at home with me. There were a few napkins to be rinsed out as the next day was Sunday and I didn't want to have them around. So I filled a large boiler with cold water and stood it on the porch floor (the most foolish things to do when little children are around) and meanwhile I went around the house to do something else. The babies were playing inside the house on the floor — I thought they were safe.

"The baby was crawling and starting to stand up wherever he got hold of something. I didn't notice that they pushed open the screen door and were playing in the porch. Being busy in the house I paid little attention to the boys, knowing they were safe (the boiler with the water in it didn't come into my mind.)

"About half an hour later the older boy came into the room tugging at my dress and saying 'Mama, baby is in the water'. At first I didn't notice him much, and he kept on that the baby was in the water and pulling my dress to show me. Then, horrors! I remembered the boiler filled with water! Like lightning I was in the porch, and the only thing I saw was the tip of his little shoes protruding from the water.

"I sure pulled him out quick, but, to my horror, the baby was gone — his face a blue color, his eyes open, mouth open, his body stiff. I ran out with the little body in my arms screaming and calling for help. Just in that moment a truck stopped in front of my house, the driver shouting 'Ice cream for sale! There I was screaming and the man shouting his wares — we were not helping the baby any, as I didn't know how to give first aid for drowning.

"So I ran to the truck, pleading to the man to take me to a doctor and showing him my baby drowned. 'Jesus Christ woman, do something with that baby. Hurry up. No use to go to a doctor. That would be too late! Never as long as I live will I forget these words. This good man quickly understood my situation. He jumped out of the truck, took the baby out of my arms and right outside by his truck started to give him aid. With him was his 14-year-old son, and he too gave a hand when his father was tired. A doctor was called from a nearby town. Meanwhile people started to gather around. Father and son worked feverishly without stopping, and still with no success, on the drowned baby.

"The doctor came, examined the body and proclaimed it dead. He turned to the people who were standing around and said that it was foolish to work and try to revive the baby when it was sure it was dead. He asked me how long I thought the baby was in the water and I told him about 25 minutes (I am sure he was in the water longer than that). The doctor said: 'Eight to 10 minutes is enough for a per-

son to be drowned.' Many people who heard this gave up hope for my baby, but not all of them. This ice cream peddler and his son didn't give up (his name is Tony Stella of Blairmore, Italian and the father of 12 children).

"They worked for hours, these two, and later my neighbor, Mr. Garison, helped too.

"As the tongue of the baby was curled up in his throat, one of the men got hold of it and had to pinch it until the blood came in order to hold it.

"This all happened around four o'clock, and about eight o'clock in the evening the baby started moaning, but give no other sign of life at all. His body was rigid, his eyes fixed. Then the blue color of his face began to disappear, and that was a good sign that there was still life in his body, so we took the good sign that there was still baby into the house. The doctor came back again — without being called this time. It was around nine o'clock in the evening, the baby still moaning and his limbs still stiff like dead. Again the doctor said 'No use. He's as good as dead. He had a great shock, poor fellow, and that was enough to kill him.' Imagine these words from a doctor when there was already evidence that there was life in that little body! Further, while the doctor was still in the house, baby's bowels started to move — another sign of life — and he still was giving my baby up! (There are witnesses to this.)

"The people were furious who witnessed such ignorance some ran out after the doctor as he went to his car, calling him back to do something for that baby. 'What do you want me to do?' he said. 'That baby is gone, finished, there is nothing that I can do.' But the moaning, doctor, that shows the baby is alive! 'That doesn't matter. I've told you he is a goner!'

"At 11 o'clock the same evening, the baby moved his toes on one foot, then a while later on the other foot. Then his eyes started to move. A woman neighbor (Mrs. Wislett, residing now in Blairmore) and I were rubbing the baby's body all over with mustard ointment. How we rejoiced when bit by bit the baby showed more life until instead of moaning he changed in sound to crying! 'Somebody brought a little whiskey, so we gave the baby about two teaspoonful and a while later he fell asleep.

"Next morning people came in to see how he was getting along, and to their surprise he was standing in his crib calling 'Mama, Mama' and waiting for his bottle of milk. Of course he was hungry!

"If it hadn't been for Mr. Stella coming along with his ice cream when this accident happened my baby would have been left unattended and died.

"I am only a humble housewife, but I think books should be written on this subject to save thousands and thousands of precious lives."

In a letter dated April 26, 1952, Mrs. Vysholli wrote again in answer to a query from the Health League of Canada, and in part her reply was:

"My son Walter did not suffer any permanent or serious effects from prolonged immersion. He grew up into a healthy and normal young man. At the age of 15 he started to work as a watchman for the Canadian Pacific Railway and today he is a locomotive fireman working himself up to an engineer. Walter also is married and is the father of a lovely and healthy boy two years old. Another baby is expected to be born to his wife next July.

"If we had listened to the attending doctor who pronounced

him dead, Walter would have been dead. People who witnessed this incident thought it a miracle when the boy revived, but I know that without working on him for so many hours this miracle would not have taken place. Instead it would have been just another drowning tragedy.

"And yet we often hear on the radio or read in the newspaper about drownings where artificial respiration was applied for two hours without success and the victim given up for dead. This I call ignorance of the worst kind!"

(The Health League of Canada insists that artificial respiration should be started immediately and kept up until the patient is revived or rigor mortis has set in.)

Bible School

Closing exercises for Vacation Bible school were held last Friday at the United church. Miss Enid Mattson, Miss Marjorie Hoffman and Miss Sone Ott, made up the Caravan in charge of the local school. Rev. Edna Pratt, of Bow Island, who is in charge of Bible school caravans for Alberta was present and spoke of the work being done.

A display of handwork completed by the children was appreciated by all who were present. The program consisted of choruses, scripture verses and presentation of certificates and prizes. Miss K. Hurlbert was in charge of the evenings program.

Crowsnest River To Be Deepened And Widened

Improvements to the Crowsnest River through Willow Drive was announced last Friday night by W. Kovach, much to the pleasure of residents of that area.

Mr. Kovach informed a public meeting that money had been authorized to widen and deepen the river, utilizing material to

raise the road. Work will be started as soon as the equipment arrives.

CARD OF THANKS

I would like to thank all the ladies who attended the show in my honor and any who were unable to attend but donated to the wonderful gifts. It is an honor I will never forget and on behalf of Mickey and myself I want to extend an invitation to anyone from Coleman to come and visit us in Winnipeg if ever you are down East. I also want to say a special thank you to all your lovely hostesses who worked so hard, and for the corsage

STRATFORD FESTIVAL

Among the top Canadian actors selected to take part in the first Stratford (Ontario) Shakespearean Festival in July are Eric House (left) and Bob Christie (right), pictured above with Alec Guinness who will star in the Stratford productions of Richard III and All's Well That Ends Well. Christie and House are well known for their performances in CBC dramas, in both radio and television.

ture part of the paper and seeing the old sites and faces that I still recall so well, made me pine to be home for that wonderful "Come back home week". We received our invitation from the Coleman Board of Trade for which we thanked them and explained we would be unable to make it, much to our regret of course!

My folks also sent me a copy of the Board of Trade 50th anniversary booklet and that I read through with great interest, and Mr. Bill Holyk and the Coleman Board of Trade really deserve to be highly complimented on their hard work and grand ideas. The Photos in the book were of lovely choice and Mr. Evan Gushul made a swell job of them as he usually does. The pictures and the old timers' stories made very interesting reading and one doesn't realize what a lovely paper the Journal really is until they get away from the old home town. The scenery in Coleman's district is as good as anywhere and already I've had compliments here on what a beautiful countryside we have there and the booklet has proven as very interesting reading and knowledgeable reading to people here, who have never seen or hardly heard of Coleman. After living, or should I say staying, in England for close to 5 years, it seems very hard to believe "the West" is so young, as everything in England is worked out by how many hundreds of years old it is!

I've been back in Canada two months past now, and my wife and son have just joined me here in Toronto, and it's a beautiful city and I'm pleased to say we're very glad to be back again! I don't think it fair to "call down" the old country, as it's a beautiful country with its beautiful green fields, hedges, stone fences, winding roads and beautiful gardens, etc! But I'm afraid once you've lived in Can-

ada, you could never settle there! Speaking, from the ordinary working man's point of view—the difference between the two countries as far as living goes, I can openly say: In Canada, "we live", and in England it's "more of an existence"! Recovery to a normal living is going to take years!

Things are picking up gradually in England but I could quite easily see that, at the rate they are going, it wouldn't be in my time! I suppose I'm leaving myself open for comment, but facts and figures and my experiences would prove it.

It might be interesting to note that up till now they haven't got a white loaf of bread on the market, although it is hoped that they'll be able to do it this year! We realize that Britain carried the brunt of the war, but after all, the war's been over eight years!

Shopping in England, for the housewife was a night-mare, the pantry was always empty. Butter and Marge and sugar and cheese closely rationed couldn't do any baking without running your self short for the table needs. When eggs were rationed it was 1 egg per person per week, and now when they took them off ration you might get a dozen and the next week you might get none!

I think that every British housewife should be decorated with a ribbon and medal and any immigrants coming here remark immediately on the cheapness and abundance of everything!

I'd like to take this opportunity to say hello to all our old friends, sorry we couldn't make it back, and we sincerely hope that "Back Home Week" was as successful and happy a time for all, as what we've had just reading about it.

—Lawrence A. Caroe, Toronto.

The Liberals say
they can't cut your taxes!

**WE CAN...
WE WILL!**

the Main Issue
in this election is
YOUR MONEY!

We will budget for Government's legitimate needs... we will stop budgeting for bloated surpluses which—in three years—took from the people's pockets the staggering sum of \$1,618,000,000 more than the Government needed.

We will end the shocking conditions in our Defence Department which the Government's own investigator, (Col. G. S. Currie) described as: "A general breakdown in the system of administration, supervision and accounting... Accounting records in a chaotic condition and of little use in determining the nature and extent of irregularities... Waste and inefficiency far more costly in loss than that covered by actual dishonesty".

We will, without impairing the efficiency of our Armed Forces, correct the appalling inefficiencies in the administration of the Department of National Defence.

We will provide the nation with an administration whose attitude towards the spending of public monies will be one of prudence and common sense. A new Government in itself will mean substantial savings to the taxpayer—it will replace a Government whose arrogant indifference to economy was best expressed by Mr. Howe's scornful remark, "What's a Million?". Or, "If they need a gold-plated piano it is our duty to buy it".

We will reduce or eliminate countless hidden, indirect taxes which grossly inflate the cost of consumer goods, add to the grievous cost of living, increase the price of homes beyond the capacity of most of our people to pay, discourage saving and initiative.

We will reduce federal taxes by at least \$500,000,000 a year... without reducing any pensions, family allowances, or other social security payments.

Radium Hot Springs Is Popular Resort

INVERMERE, B.C. — Radium Hot Springs, \$1,000,000 aqueduct built in 1951 by the federal government opened earlier this year, is expecting a record number of tourists and arthritic sufferers seeking relief.

A new 25-metre pool, half olympic size, has been lighted by 17 1,000-watt submerged lights and the 114-degree (Fahrenheit) water issuing from the rocks at the source is expected to attract well over last year's 120,729 visitors.

The water from the pools flows from the base of Redoubt mountain at a rate of 300 gallons a minute.

Chemical analysis has confirmed the existence of radium in the water. While medical authorities remain reluctant to concede the curative value of the water, it is reported that many people arriving in wheel chairs or on crutches have walked away after relaxing in the tepid bath.

When James Sinclair (whose name remained on the nearby canyon, pass and creek) visited the spot in 1888, the Indians told him of the springs. They held great faith in the healing quality of the waters.

The pools became more popular following construction of the Banff-Windermere highway, but a log and stucco building erected to accommodate the ever-increasing flow of visitors was ravaged by fire in 1948.

The federal government in 1951 remedied the situation with the big aqueduct which has attracted visitors from almost every part of North America and from overseas.

The Radium Hot Springs Chamber of Commerce this year plans to build a series of trails and footpaths throughout the park for visitors. A more ambitious project is to light Sinclair Canyon at night so that its renowned scenery may be seen after dusk.

Many Entries Expected To Regina Exhibition

An informative 100 page prize list, giving details of general rules and regulations governing livestock and exhibit entries to the Provincial Exhibition to be held at Regina, July 27th to August 1st, has been issued by the Regina Agricultural and Industrial Association.

Gentlemen and Farmers will note that livestock and field husbandry entries close on July 11th. Ladies will observe that Women's Department entries, covering baking, canning, needlework and handicrafts, close also on July 11th. Entries for the Amateur Photography Exhibit close on July 7th, for honey on July 18th and for Horticulture, which embraces cut flowers, house plants and vegetables, by July 22nd.

Interested persons are invited to write T. H. McLeod, Manager, Regina Exhibition Association, 2 Victoria Park Building, Regina, Sask., for this Prize List, entry forms and detailed information. Owing to the prevalence of foot and mouth disease among cattle last year, no livestock entries were accepted. This year, however, entries in all branches of exhibits are expected to be much larger.

The prize list describes the requirements for entries of light and heavy horses, beef and dairy cattle, sheep and swine with trophies and prizes. The Junior Beef Club and Saskatchewan Dairy Calf projects will be of interest to farm youth. There will be awards for Field Husbandry in wheat, oats, barley, rye, flax, peas, alfalfa, crested wheat, broom and western rye grasses.

The Regina Exhibition Association has, with the assistance of the University and the Department of Agriculture, operated a Farm Boys' Camp since 1914. This Camp is for boys 14 to 18 years of age inclusive when the Camp opens, and it affords them an opportunity for an educational holiday. A similar Camp for girls, 15 to 18 years of age, will also be held. Teams will consist of five boys while in the girls section, three will comprise a team.

A Mantle Memorial Scholarship of \$125.00 and an Imperial Oil Limited Scholarship of \$100.00 will be awarded to boys from the 1953 Farm Boys' Camp, and will be usable at the College of Agriculture, Saskatoon, or the School of Agriculture, University of Saskatchewan, within five years.

The teams of boys and girls must be sponsored by one of the four official agricultural organizations, namely: Agricultural Committees, Agricultural Societies, Boys' and Girls' Clubs (including Girl Clubs) and Homemakers' Clubs. The camp will be open for residence at 6 p.m. July 27th. The official programme will be carried out on Tuesday, July 28th, Wednesday, July 29th, and Thursday, July 30th. Registration should be made immediately and applications sent to the Director of Extension, University of Saskatchewan, Saskatoon.

It Was Lucky Day For This Lady

LETHBRIDGE, Alta.—Mrs. J. R. Firth of Lethbridge bought ticket No. 1 in the Kinsmen club raffle at the annual fair here.

The last night of the fair, she went out to the grounds and also tried her hand at bingo. By the time she called quits she had won two lamps, a toaster, three sewing platters, a blanket and a set of dishes.

Then, out of curiosity, Mrs. Firth wandered over to the Kinsmen car draw clutching the first ticket sold in the raffle. Mayor A. W. Shackelford obligingly drew ticket No. 1 from among the thousands in a large tumbler.

Alberta Man Never Fails To Find Water

COWLEY, Alta.—An 81-year-old south Alberta man is one of the few persons who cling to the ancient practice of "water witching".

Ernest Cooknell of Cowley says he can locate an underground water supply by walking over the ground clutching a branch of a willow tree. When the wand is over a water source it waves violently, he says, and sometimes the bark is torn away. Only a green willow is used. The wand, a three-foot slice of a young willow tree cut in the shape of a prong, sometimes will bend upwards and sometimes down. But whenever it "wiggles", there is water underneath.

Mr. Cooknell discovered his "witching" talent in his boyhood days in Oxfordshire, England, after watching some water searchers from London.

He says four of his family could make the wands wiggle over water, but four others could not. He doesn't know how or why he possesses the talent since he came to Cowley in 1901. He has found water at depths ranging as much as 230 feet.

He has never taken money for a job, believing the charm might be broken if used professionally.

Wild Oats In Prairies Number One Weed Problem

Grass-type weeds, particularly wild oats, are now more troublesome than all other weeds. It was stated by H. E. Wood, Manitoba Department of Agriculture, at the Canadian Seed Growers' Convention in Wausgaming.

"Over much of the three Prairie Provinces, wild oats present greater weed problems than all other weeds combined," he declared.

During the past 50 years, loss through weeds has been enormous over much of the farmed area of the Prairie Provinces, Mr. Wood pointed out. "A fertile soil, mainly under extensive mechanized grain growing," he said, "has contributed to what in recent years has come to be considered an alarming weed problem."

The attack on weeds is being made from three approaches, Mr. Wood stated—organized control by provincial and municipal governments; advanced farm mechanization; and increased production of selective or systemic herbicides.

Mr. Wood indicated the herbicides used in agricultural weed control as follows: Soil Sterilizers—Chlorate and boron compounds have been found effective against several species of persistent perennial weeds. Main objection to this type of herbicide is that it sterilizes the soil over a period of years.

CMU—Newest type of soil sterilant not yet recommended for agricultural use.

2,4-D—Proven safe, effective, easy to apply and a very cheap herbicide. Especially effective on most annual weeds. Particularly effective on annual weeds.

MCP—A British-European relative of the 2,4-D family. Less harsh than 2,4-D on Canada's sensitive crops as legumes, flax and oats; more effective than 2,4-D on Canada's thistle and hoary crosses.

MCA—Favoured as a means of eradicating grasses, especially couch. Important in the control of green foxtail in flax fields.

TPC and CIPC—Under favourable conditions it is reported to be effective in the control of wild oats in field peas and sugar beets.

Since 1927, hydro-carbons from petroleum and natural gas have become a source of raw materials for more than 2,500 different chemical products.

Weekly Tip

CHINA

China dishes that are discolored can be readily cleaned by using a solution of salt and vinegar.

Chemical Weed Control

By H. E. Wood :: Chairman of Manitoba Weed Commission

This is the second article that deals with weed control, mainly by means of chemicals.

The Rate To Apply Chemicals

Years of farm use have proved that 2,4-D recommendations appearing on the containers are sound and reliable. These instructions should be carefully followed, otherwise damage to the crop may result, or a none too satisfactory weed kill may be obtained. In this talk I shall deal with 2,4-D and chiefly the different rates at which it should be used. The kind of crop, the weeds infesting the crop, and the weather, especially as it affects the growth of the weeds, will all have a bearing upon the rate of application. In addition the formulation used will make a difference. In general, a higher rate of Amine is needed than with the Ester of 2,4-D.

Weeds differ greatly in their susceptibility to 2,4-D. Many, for example, wild mustard, are quite sensitive and can be killed with relatively low dosages—3 or 4 ounces acid per acre. Others, such as thistles, are less sensitive and fall into a "more difficult to control" group. To successfully control these weeds the rate is increased to sometimes as much as 8 ounces per acre. On a few of the most difficult to kill weeds an even higher dosage may at times be advisable.

The effect of 2,4-D on the crop must be considered also. Wheat, Barley and Rye are the most tolerant crops to 2,4-D. When treated at the proper time they will stand, without fear of damage, the highest rates it will be necessary to apply.

Oats and flax are less tolerant and the rate for these crops is better to be kept somewhat down even at the expense of a less satisfactory weed control. Field peas and legume crops are very sensitive but are tolerant to the new chemical MCP, at relatively low dosages.

Weather, particularly temperature and rainfall will have a very marked effect on the rate at which you will apply 2,4-D. With unfavorable growing conditions the rate will have to be increased by as much as one half over that required under conditions favorable for rapid growth. Where 2,4-D is applied as Dust, rather than spray, a higher rate should be increased by approximately one-third.

The careful farmer will do well to consider his weed problem, the crop to be treated and growth conditions as he checks instructions on his 2,4-D container and decides how much he will apply per acre.

When and How To Treat Crops With 2,4-D

The best time to kill weeds with 2,4-D is fortunately a "safe period" as far as most crops are concerned. The one exception to this general statement are oats, which differ from wheat and barley.

Wheat, barley and rye, while generally quite tolerant to 2,4-D, should not be treated in the seedling stage. Treatment should be delayed until the plants have reached the 4-leaf stage. This will be about three weeks after the crop appears above ground, or when the grain plants have reached a height of about six inches.

Treatment can be carried on safely from stooling to jointing stage until the early shot-blade stage, when the danger point is reached. From the time the shot-blade just appears through to heading, treatment must be withheld, otherwise serious damage may be done to the crop. After the flowering period is past it is safe to treat wheat, barley and rye, but difficult to do, other than by aeroplane.

Oats differ from wheat and barley in that they are more sensitive to 2,4-D. Oats may be treated for a short period just after the seedling stage. This will be from the 3 to the 6-leaf stage. As soon as the jointing period is reached they are very subject to damage, also again at flowering time. From shot-blade

and into the early boot stage treatment can take place. Also again after flowering.

The period in which to treat flax differs from cereals. Treatment for flax can commence at the seedling stage until the first buds appear, then treatment must cease. After the 3rd, and 4th, leaf appear, (and this is about the time the weeds are showing), flax is ready to treat right on through to the first sign of buds. After flowering is completed flax can and often is treated successfully.

Careful timing in relation to both the stage of crop growth and weed growth is very important in the successful use of weed killing chemicals.

Care Is Necessary In Using Chemicals for Weed Control

Chemical weed killing materials are potent and very effective, but need to be handled with care. Used carelessly they can cause damage. This is mostly by drift to nearby sprays, crops, gardens and windbreaks. Fortunately very few weed chemicals are poisonous to humans and animals. 2,4-D is non-poisonous and non-flammable.

The first step in handling chemicals, such as 2,4-D is to carefully measure the amount of 2,4-D to be added to a known gallonage of water. Neither the gallonage of water nor the amount of 2,4-D to be added should be guessed at—always measure the exact amount of each. The same applies to all other weed chemicals.

Care in applying the material, whether spray or dust, is very important. The machine used for the job must be in A-1 working order. With sprayers particular care should be given to pump pressure, plugged nozzles and the correct height of the boom in relation to the crop being sprayed. Care is necessary to avoid "misses" and "overlapping" areas. A marker is not used properly flags at each end will aid in proper coverage. I cannot over-emphasize the need of such a device that a good application job is made.

The matter of drift, especially if dust is used, should never be overlooked. Fortunately, to date very few complaints have been made against careless operators. Avoid application on windy days. Remember, windbreaks, gardens and some crops, such as sunflowers, are very sensitive to 2,4-D.

One last word on the sprayer or dustifier. If used for other purposes on windy days, it should be thoroughly cleaned before used.

Treating Crops That Are Sensitive to Chemicals

Cereals, excepting oats, are more tolerant to 2,4-D and other chemicals, than are flax, field peas, alfalfa and the clovers. Those planning to treat these more sensitive crops would do well to observe the following two points:

1. It may be worthwhile to use MCP rather than 2,4-D on sensitive crops.

2. Instructions should be carefully followed as to the correct dosage for any one of these crops. For sensitive crops a lower dosage is used than for the more tolerant crops.

Before dealing with each of these crops in turn, just a word about MCP which is a close relative to 2,4-D. MCP under wide trial in this country during the past year or two has proven to be less harsh on the more sensitive crops than 2,4-D. It is a satisfactory weed killing job, except on harder to kill weeds, notably Russian Thistle.

OATS—Due to their greater sensitivity to chemical treatment, oats are perhaps better treated with MCP, rather than 2,4-D. If 2,4-D is used the Amine is preferable to the Ester. If treatment must be made during the shot-blade stage cut down on the dosage.

FLAX—Here again, MCP should be the first choice. If 2,4-D, use the Amine and at a lower dosage than for cereals.

FIELD PEAS—MCP is recommended and then at 1 1/2 to 3 ounces acid per acre—a quite low dosage. ALFALFA AND CLOVERS (other than Sweet Clover)—Here, too, MCP is recommended at from 2 to 4 oz acid per acre.

The dimethyl compounds can be used for treating field peas, alfalfa and clovers. With a little care in selecting the right chemical and keeping the dosage down the more sensitive crops can be weeded successfully with chemicals.

FOILING A KILLER

Tetanus, commonly called lockjaw, is a disease that attacks children and adults through what often appears to be a minor wound. A germ, entering a cut or scratch, can cause unbearable pain and often death. The germ is found in earth and those who work on the land, especially where there have been grazing animals, are in particular danger. It is possible to be immunized against tetanus. Such immunization is usually given to children at the same time as they receive a toxoid protection against diphtheria.

Erosion causes a daily loss of some 8,000 acres of land in the United States.

Target Control Pitching

Any big league manager will tell you that the two most important fundamentals of effective pitching are control and a fast ball. Here's a training system you can use to develop both.

Have the catcher stand behind the plate with his feet spread the width of the plate. Have him stand up to catch with his knees only slightly bent, not from the crouch position. A catcher in this position gives you an ideal target to shoot at. By aiming the ball at either his shoulders or his knees you can hit the ideal pitching targets—the corners of the plate. By pitching your strikes in these spots you are throwing the ball where it is hardest to hit.

Each day after your warm-up, throw 16 speed balls and try to make each one faster than the last. Throw 4 balls at his left shoulder, 4 at his right shoulder, 4 at his left knee and 4 at his right knee. Then count up the times you actually hit your target. When you get to that you can hit your target 12 times out of 16, you will know that you are getting real control.

This practice will not only improve your control, but it will also develop your speed. To throw more than 16 times at top speed is not necessary. If you throw this number of speed balls and try to make each one faster than the last it will give you arm just the right amount of work, and if your arm gets the right amount of work, it will gain in strength and power. Try this stunt for a week or two.

Kitchen Meditations

By JANE DALE

THERE IS LITTLE TIME

Haste now to see while yet you may
The poplar leaves like green coins
hanging.

The plum tree with each branch a
snowdrift;
The mother robin eyeing the world
expectantly.

And the young grain sprouting.
Haste now to breathe while yet you
may

The perfume from the lilacs waving
ing.

And from the chokecherry blossoms;
The tangle odor of the fir tree's
budding.

And the new lawn grass showing.
Haste now to catch while yet you
may

The robin's early morning trilling;
The gossamer mist before the dawn;
The dew like bright jewels shining
On every leaf and flower.

All this is gone too soon
When once the month of June
Gives way to summer, then
All these have lost their newness.

Their beauty and their freshness,
And will not return again.

On The Side - By E. V. Durling

He Could Hit Hard

Gene Tunney was "a brilliant boxer but not a hard hitter." So says a sportsman. The gentleman knows not where he speaks. Tunney was one of the hardest hitters ever to step into the squared circle. Harry Clark, who fought Gene five times, once observed, "that Tunney slings a right that tears your insides out."

Irish At The Bar

Irishmen make great lawyers. They are usually well skilled in the art of cross-examination. A check might reveal the majority of great legal lights have had a bit of Irish in them. The thought brings to mind that it was Dublin-born Edward Carson, one of the greatest lawyers of all time, who defended the Marquis of Queensbury in the celebrated case involving Oscar Wilde. Carson also brought the criminal known as "Jack the Ripper" to justice. He was also the lawyer for the defence in the case which was the basis of the recent hit play titled "The Winslow Boy."

His Wives Agreed

Marrying three times, a man deserted each wife in turn. He had seven children by his first wife, five by a second, one by the third. The law caught up with him and he was arrested for bigamy. All three of the women he married appeared in court to testify. And so what? They all said he had been a wonderful husband and father. That they still loved him despite the fact he had left them flat. That's the kind of love that is really wonderful. Or should I say strange? Anyway, it is happenings like this that incline me to give up trying to understand women.

It Could Be So

Note penicillin is being used by some agriculturists to make pigs grow faster and larger. How about the many people who are allergic to penicillin? Are they likely to become ill after consuming ham from a pig who has had penicillin mixed with its food?

The Brainier Sex

"The feminine brain is clever and resourceful. The greater the cleverness, the less it is suspected." So, observed Howard D. Stewart. Keep that in mind, young fellow. Don't be too quick to decide a girl is dumb, even if she is a blue-eyed blonde. This recalls that my uncle, Al said to me the day I graduated from high school, "Edgar, if you will always figure, regardless of appearance or actions, that any woman you meet is smarter than you are, you will find the highway to life much easier to travel."

Definition of Courage

"Courage is resistance to fear, mastery of fear—not absence of fear," said Mark Twain. General Douglas MacArthur once observed, "Most soldiers are afraid."

Dogs on Leashes

A leash law for dogs is something I have always favored. I am against dogs being permitted to run loose when not accompanied by their owners. In previously advancing this opinion, I said among other things that a dog running across a street might cause an autoist to turn out to avoid hitting him and this move might result in a serious accident. It has just happened. In Los Angeles a young fellow was killed when he tried to avoid a dog running across a street, lost control of his car and ran into a fire hydrant.

Merchandising Technique

In Denmark, after some shop owners close their stores for the night, they continue to make sales of their products by slot machines placed in the front of their establishments. Some shops retail as many as 70 different items after closing hours by means of slot machines.

An Indication

If a young woman is very fond of her father and enjoys his company, she is quite likely to make a very good wife for some deserving young man. However, if she doesn't care for her paternal parent and he is indifferent to her, it is possible she will not be a grade A matrimonial partner. Or so some research on the subject indicates.

Spraying Sheep Flock Proving Beneficial

Of special interest to shepherds in all parts of Canada is the prospect of spraying supplementing dipping in the control of ticks and lice which infest the flock from year to year. A practical demonstration in the use of Cooper-Tox, a new toxaphene product developed by Coopers, was followed closely by a few hundred flock-owners who attended a Sheep Field Day, staged by Ontario Sheep Breeders' Association at Meaford, Ontario. It was pointed out that this treatment had proven its worth for three seasons in United States and that in 1952 over 15,000 sheep in Western Canada had been sprayed with results indicating complete eradication. No claim was made that spraying would supersede dipping but shepherds were urged to do one or the other and thus ensure better lambs and better wool. The great advantage of an effective spray such as Cooper-Tox is that even the smallest farm flock can be treated with minimum effort and cost. A small hand sprayer will do the job and the cost will not exceed two or three cents per head—considerably less for larger flocks and the use of power sprayer.

ANCIENT EGYPTIANS

As far back as 2,600 years before Christ, the Egyptians made artificial eyes of glass, ivory, feldspar and pearl.

Alberta Encourages Car "Rodeos" For Safer Driving

Safer and more skillful driving are being encouraged through the car "rodeos" of the Alberta Highway Traffic Board.

Patterned after the well known truck rodeos, the car rodeos are built around a series of scientifically designed tests through which average motorists drive regular stock models of cars.

The tests call for exacting driving on the part of the contestants, and serve as a practical demonstration to the public of the skill required to drive a car safely and well.

Any municipality or organization wishing to promote a car "rodeo" may receive information from C. J. Kenway, Technical Advisor, Highway Traffic Board, Edmonton. Officials of the Highway Traffic Board, the Alberta Motor Association and the Alberta Safety Council will assist in staging and judging the event but a local organization is required to act as sponsor. Permission to use a section of road for the "rodeo" must be obtained from the local municipal government.

NO SEA GULLS

Shanghai is the only great harbor in the world that has no sea gulls. Many poor families living in junks at the water's edge use all the refuse thrown overboard by ships in the harbor. The gulls, therefore have gone to other ports.

WEEKLY BIBLE COMMENT

PAUL MINISTERED TO THE THESSALONIANS

Among the sources of information describing the Apostle Paul's visit to the Thessalonians, and his founding of a church there, are two outstanding Epistles. They are vital if we are to complete the story.

Lumped with the Acts, the two Epistles throw a great deal of light on the nature and method of Paul's ministry. Also illustrated for us are the conditions under which Paul founded his churches. The character of their membership is revealed. We also can determine their duration and their problems.

Paul's many enemies tried to get him in trouble with the Roman authorities by accusing him of saying there was a non-Roman king, one Jesus.

These enemies were so successful that Paul and Silas had to escape for the time being. Jason, their host, had to give evidence of his security to the authorities.

The membership of the church in Thessalonica seems to have consisted, for the most part, of Greeks and women. The same was true of a neighboring church at Berea, although men there are specifically mentioned in the texts.

Some Jews also joined the Christian group, but the preponderance of Gentiles may have accounted for some of the strange problems which arise in the church.

In the group of newly formed Christians there were evidently some idlers and loafers who were probably drawn into the group when they heard that the Christians taught that one should share what he had with his neighbor and help him as much as possible.

Paul, who plainly stated that he who does not work should not eat, stressed the fact that he supported himself.

Just how he managed to support himself on his travels and while working in his ministry is not clear. But Paul was a superman!

Chinese Goes To Jail To Learn English

VANCOUVER—A 21-year-old Chinese who asked to be sent to jail so he could learn English got his wish in police court.

Jung Fook Gin will spend three months' alternate and six months' indeterminate in prison for carrying a loaded sawed-off rifle on the street. At the time of his arrest he said he wanted to be a robber so he would be sent to jail where he could learn English.

Mr. and Mrs. B. Bond and family holiday at Couer D'Alene.

Mrs. Donna Emery is holidaying at her home in Cranbrook.

E. Richards of Calgary, visited with Mr. and Mrs. Ziajka.

Mr. and Mrs. J. Allan and family holiday at the west coast.

Mrs. Dyck is visiting at Creston and Canyon City, B.C.

Born to Mr. and Mrs. John Hoobenoff, July 6, a son.

Born to Mr. and Mrs. K. Wasyon, July 8, a daughter.

Born to Mr. and Mrs. Kulig, July 11, a daughter.

Born to Mr. and Mrs. Fred Small, July 11, a son.

Mrs. E. Somshor and daughters are holidaying at Sylvan Lake.

Wallace Neale has secured employment for the summer with a plumbing firm in Calgary.

E. Michal of Calgary, visited at the home of Mr. and Mrs. M. Hazuka.

Miss Irene Antonenko, R.N. of Drumheller, was a visitor at the home of her parents here.

Born to Mr. and Mrs. L. Dworkin, nee Lily Supwot, at Fernie Memorial hospital, a son, July 3.

Mr. and Mrs. Ed. Ledieu purchased the home formerly owned by Mr. and Mrs. O. Smith.

Mr. and Mrs. J. Ramsay were holidayers at Couer D'Alene recently.

Mrs. F. Vincent and Gall are spending three weeks holiday at Mayerthorpe.

Mrs. E. Ash left by plane for Vancouver to visit with her son, Mr. and Mrs. Roy Ash.

Mrs. Mary Fraser, daughter Patricia and son Billy of Calgary, visited here recently.

Mr. Walter Nelson left last week for a holiday in Nova Scotia.

Mr. and Mrs. J. Malanchuk were McBal Lake visitors last weekend.

Mrs. J. Holyk and daughter are holidaying at McBalnes Lake.

Mr. and Mrs. W. Lonsbury and family are holidaying at McBalnes Lake.

Mr. and Mrs. H. Hewitt and family are holidaying at McBalnes Lake.

Walter Nelson was a recent visitor with his son Curly in Calgary.

Mr. and Mrs. C. D'Amico, of Nordegg, were Back Home Week visitors at the home of Mr. and Mrs. Ed. Ledieu.

Born to Mr. and Mrs. Ron Jenkins, nee Anna MacQuarrie, a son, July 12 at Fernie Memorial hospital.

Mr. and Mrs. Jake Peters and family of North Battleford, visited at the home of Mr. and Mrs. C. MacQuarrie.

Mrs. John Buckna is a Banff Alberta visitor attending the Music Section of the Banff School of Fine Arts.

Mrs. D. Malcolm and son of Fort Macleod were the recent guests of her parents Mr. and Mrs. E. Ash.

Mr. and Mrs. S. Gillis and Nell Fleming attended the funeral of Mr. Peebles at Lethbridge last week.

Mrs. D. Welford, of Calgary, was a recent visitor at the home of her daughter Mr. and Mrs. J. C. Gray.

Mr. and Mrs. J. C. Gray and son spent the weekend in Calgary and took in the last day of the Stampede.

Mr. and Mrs. W. Mozzell and family are spending a holiday at Lacombe and other Alberta points.

Sheep took over Coleman a week or so ago when those going to work were amazed at the

large flock going down the main street. Estimates of number ranged from hundreds to thousands. Forestry officials report that 1150 sheep comprised the flock from Coaldale that will spend the summer months at the Vicary-Daisy Creek Grazing Division.

Mr. and Mrs. L. Armer and family and Mr. R. Armer of Calgary, attended the Gejdos-Bowman wedding here last week.

Mr. and Mrs. S. Hatulchuk and family are visiting at Peace River and attending the wedding of her sister Viola Rucka.

Oil sismograph crews are reported working the area in larger numbers this year, operating to the north, west and south of Lundbrek.

Mr. and Mrs. A. Dewar have returned from spending two weeks with their daughter, Mr. and Mrs. R. Donaldson at Cranbrook.

Misses Sharon and Valerie Lloyd, of Calgary, have returned home having been the guest of Miss Mary Colley for the past two weeks.

Mr. and Mrs. R. W. Beddington of Lethbridge and Sgt. and Mrs. F. O. Beddington of Edmonton, have returned to their homes after visiting Mr. and Mrs. F. Beddington for two weeks.

Mr. and Mrs. Pete Meroniuk and family visited at Calgary and spent a holiday camping and fishing in the Elk Valley. Pete reports the river high but fishing good.

A representative float from Coleman participated in the Calgary Stampede parade. Pete Meroniuk entered his bucking horse float and had a picture of it appear in the Calgary Herald.

Mrs. J. Webster and daughter Ellen, of Shaughnessy are visiting with Mr. and Mrs. Gillis. Capt. J. Webster visited here enroute to a training camp in the U.S.A.

Mr. and Mrs. J. J. Laithwaite, Kinsley, Sask., arrived Saturday to visit with his mother Mrs. N. Goulding, who accompanied them on a two week holiday to Nelson and Couer D'Alene.

Mr. and Mrs. Dan Daly of Calgary were among the Back Home Week visitors to Coleman and were the guests of Mr. and Mrs. J. C. Gray.

Among those spending Sunday at McBalnes Lake were Mr. and Mrs. R. Lingard, Mr. and Mrs. M. Kubica and family, Mr. and Mrs. J. Dorshack and family, and Mr. and Mrs. A. F. Panek and family.

Mr. and Mrs. F. Guerdard, accompanied by Mr. and Mrs. R. Greenhalgh, were Calgary visitors last week. Mr. and Mrs. Greenhalgh remained for a two week holiday.

Town crews are busy building new sidewalks in town. Foreman Joe Malanchuk reports that a 10 foot walk has been completed by the Empire Hotel and another 10 ft. walk was underway east from the Liquor Commission store. Another 4 1/2 foot walk will be built at the underpass.

East Coleman and Willow Drive Fire crews have received some equipment to assure a measure of prevention. The provincial government has provided East Coleman with 2 five gallon hand pumps and Willow Drive with one. These pumps will serve to keep fires in check until the Colman brigade can get to the scene.
